PROFILE

Senior Linux Infrastructure Engineer and Systems Administration Team Lead with 8+ years of hands-on experience managing production infrastructure, large-scale hosting platforms and customer-facing services.

EXPERIENCE

Systems Administration Team Lead

Veridyen Information Technologies LTD | 2026-Present

Leading the team. Staying close to the systems. Owning technical escalations and infrastructure reliability while helping other engineers grow.

- Coordinate high-priority incidents, technical escalations and root cause analysis.
- Mentor administrators and improve documentation, monitoring and operational practices.

Systems & Infrastructure Engineer

SCB Network LTD | 2024-Present

Founded and architected a Linux-based hosting infrastructure platform. Automation, isolated deployments and security designed into the foundation.

- Docker isolation, Nginx reverse proxies and automated provisioning workflows.
- WordPress hosting with wp-cli, restricted access, Redis and OPcache caching.

System Administrator

Veridyen Information Technologies LTD | 2021-2026

Production Linux infrastructure supporting thousands of customer websites and applications. Availability, performance and security under real operational pressure.

- Tier 2/3 support, incident response and root cause analysis under SLA requirements.
- Operated AlmaLinux, CentOS, Ubuntu, web servers, databases and Exim mail systems.

Systems Administration Intern

Confidential Technology Company | 2020-2021

- Assisted with Linux server administration, networking and virtualization.
- Supported monitoring, server configuration and operational maintenance.

Freelance Systems Engineer

Independent | 2017-2020

- Custom software and infrastructure integrations for Digicell Telecommunications.
- Linux server and SIP-based virtual PBX deployment, configuration and troubleshooting.

Technical profile

Samet Kabakçı / Systems, platforms & automation

TECHNICAL SKILLS

Linux / Production experience

AlmaLinux, CentOS, RHEL-based systems, Ubuntu, systemd, LVM

Web infrastructure / Production experience

Nginx, Apache, LiteSpeed, PHP-FPM, SSL / TLS, WordPress

Databases / Production experience

MariaDB, MySQL, MSSQL, Redis, OPcache

Security / Production experience

SELinux, SSH hardening, Firewalls, Fortigate, TLS, Patch management

Automation / Applied automation

Bash, Python, PowerShell, Docker, Docker Compose, wp-cli

Cloud & virtualization / Virtualization experience · Cloud fundamentals

VMware ESXi / vCenter, Proxmox VE, SolusVM, AWS fundamentals, Terraform fundamentals, Ansible fundamentals, Kubernetes fundamentals

Monitoring / Production experience

Grafana, Metrics & logs, RCA, Incident response, SLA operations

SELECTED PROJECTS

Hosting Infrastructure Platform

Founder & Infrastructure Engineer | SCB Network LTD

Built and operated an independent hosting platform with container-based isolation and automated provisioning workflows.

Self-Hosted AI Assistant

Infrastructure & Interface Developer | Independent project

Deployed the assistant on a private Linux server and published a custom web chat interface.

AI-Driven WordPress Generation

Platform Designer & Developer | Independent project

Developed an AI-powered generation platform with an architecture designed for future model and infrastructure expansion.

Needtowatch.net

Founder & Full-Stack Developer | Independent project

Founded and developed the platform, owning application architecture, frontend, backend and infrastructure.

EDUCATION

Celal Bayar University

Computer Software Engineering | 2012-2016

Konak Atatürk Anatolian Vocational High School of Commerce

Information Technologies | 2006-2010
